PERSONAL PROJECTS

Swigato ⬈
- Swigato is a food delivery platform in which react is used for frontend and springboot is used for backend. In this web app Spring Security is implemented with jwt authentication to secure endpoints.MySql Database is used for storing the data in form of tables

Movix Website ⬈
- Movix is a Movie or TV Series information website . It is made by using React JS, TMDB API, Redux in which data is fetched by TMDB API. In this website i make a redux store which pass information to all the react components

Portfolio ⬈
- It is my personal portfolio website which is made with react js and i used basic react concepts like hooks , passing props from one component to another and i share my whole experience in my portfolio

WORK EXPERIENCE

Internship(Frontend Developer)
Business Web Solutions

02/2023
Achievements/Tasks
- I learn about how to fetch data from API's and worked with the fetch data and use this concept to make projects.
- I learn from here, how to work with other team members.
